ENGINEERING MANAGER

Experienced and dedicated hands-on Engineering Manager with a proven track record of leading both small and large teams. Adept at fostering clear communication, ensuring on-time project delivery, and making impactful individual contributions. Actively seeking a new opportunity to apply my well-honed skills towards technological advancement, with a keen focus on personal and professional growth.

PROFESSIONAL EXPERIENCE

Vimeo Inc. New York, New York

Engineering Manager (Remote) 2025 – Present

- Managed a 4-member Agile engineering team, driving sprint planning, on-time delivery, and career development.
- Drove evaluation, hiring, and onboarding of contractor engineers, ensuring rapid integration and alignment with team goals.
- Projects / Individual contributions
  - Integrated Sierra AI to increase AI credit utilization and surface bandwidth upsell opportunities.
  - Developed a self-certification component for 18+ age verification in U.S. regions requiring compliance, designed with a flexible architecture to easily extend to additional regions.
  - Guided Phase 0 of Vimeo's bandwidth self-serve initiative, maintaining existing 2 TB/month caps while launching new annual bandwidth plans via the Sierra/Sales pipeline, driving a 4% lift in renewal rates from Q4 '24 to Q3 '25 and contributing to a 14% YoY increase in net bookings.
  - Drove "Offer More Storage" experiment, testing expanded entitlements across Free, Starter, and Standard plans to evaluate impact on bookings, plan mix, and conversion, informing product strategy ahead of Review launch.
  - Expanded Sierra AI's reach to the pricing experience, helping users match plans to their goals and improving early-funnel engagement and monetization.
- Member of Vimeo's Frontend Reviewers team, enforcing best practices and ensuring high-quality, consistent frontend code across teams.

Course Hero Inc. Redwood City, California

Staff Software Engineer 2023 – 2025
Engineering Manager 2022 – 2023
Lead Senior Software Engineer 2021 – 2022
Senior Software Engineer 2019 – 2021

- Led a 10-member Agile engineering team, driving sprint planning, on-time delivery, and career development.
- Championed the utilization of Server-Side Includes (SSI) front-end framework, strategically implementing this approach whenever feasible, resulting in a significant reduction of deployment times from 45 minutes to an impressive 10 minutes, thereby enhancing overall efficiency and streamlining operations.
- 3-time Course Hero Hackathon Winner 2020, 2021, 2023
- Projects / Individual contributions
  - *AI initiatives*
    - Boosted engagement by 80% by leading the integration of GPT Vision on our unlocked document page, enabling users to crop areas for in-depth analysis. My leadership ensured the seamless productization of this cutting-edge feature, enhancing overall user experience and functionality.
    - Increased mobile web user engagement by 1% by adding Essay and Multiple-Choice chat features.
    - Increased user engagement by 10% with Essay and Multiple-Choice Based AI Chat feature that enhanced student support, providing interactive engagement for summarizations, outlines, study materials and additional clarifications through AI.
    - Boosted stagnant document uploads through a 6% increase via enabling uploads from cloud storage vendors (Google Drive, OneDrive, and Dropbox).
  - *Document Platform*

        - As an engineering manager spearheaded the implementation of the mWeb document platform into the new Server-Side Includes (SSI) framework to ensure a more sustainable and forward-looking technological foundation.
        - Leveraging flexible layout project as the foundation, we engineered a new platform housing the advanced document viewer, amplifying students' study capabilities and culminating in a noteworthy annual revenue gain of $605k.
        - *Flexible Layout*
            - After upgrading the document viewer, we began enhancing the unlocked document product by strategically overhauling the viewer, header, and sidebar, migrating the layout into our advanced framework to improve developer experience and accelerate load times, ultimately boosting user satisfaction.
        - *SmartScan*
            - Enhanced student study experience by quickly integrating newly uploaded documents into the updated Course Hero viewer, utilizing machine learning to create interactive questions for swift and accurate student responses, enhancing engagement and knowledge acquisition in line with Course Hero's commitment to advanced educational tools.
        - *Document Viewer Upgrade*
            - Directed a company-wide initiative at Course Hero to modernize the core document viewer by transitioning from static PDFs to dynamic runtime HTML, integrating React components for seamless engagement with ML-identified question and answer interactions, resulting in a marked improvement in user experience and underscoring a commitment to substantial technology solutions improvement.
    - *Structure Documents as Questions*
        - Dramatically improved search rankings by restructuring multiple-choice question documents to exclusively showcase ML-identified questions for search engine bot crawling.
    - *Answer Blockers*
        - Upon reaching our locked document page, students encounter strategically placed CTAs featuring ML-identified questions with corresponding answers; to boost user confidence and encourage sign-ups, we aimed to introduce dynamic CTAs showcasing Course Hero's answer availability.
    - *Amazon Subscription Partnership*
        - Headed a project wherein Course Hero joined forces with Amazon to introduce an exclusive and budget-friendly subscription to Course Hero services for Prime members.
    - *mWeb Header Refresh*
        - Seamlessly redesigned the mWeb header and transitioned its code to the Server-Side Includes framework (similar to Next.js) to reduce reliance on the monolithic architecture.
    - Delivered user-facing enhancements including Blockers Refresh (desktop/mobile CTAs), Benefit-Led Onboarding (personalized document suggestions), and Uploader Tagging (auto-complete metadata), improving engagement and accuracy.
    - Encouraged Cypress integration at Course Hero, leading testing initiatives, fostering cross-team adoption of a comprehensive test suite, and advocating for enhanced stability through front-end unit testing.

EARLIER EXPERIENCE: Software Engineer – Chegg; Web Developer – TiVo; Teaching Assistant – CCSF.

RELEVANT SKILLS

LANGUAGES	:	TypeScript, JavaScript, Python, Java, PHP, HTML, CSS, SQL, Go
FRAMEWORKS/DBS	:	Node.js, Next.js, Django, AngularJS, MySQL, PostgreSQL, Symfony, Tailwind CSS
